

# THE MOMBASA POLYTECHNIC UNIVERSITY COLLEGE Faculty of Engineering

## DEPARTMENT OF BUILDING AND CIVIL ENGINEERING

DIPLOMA IN BUILDING

# **MEASUREMENT, ESTIMATING AND COSTING**

END OF SEMESTER I EXAMINATION

SERIES: APRIL/MAY 2010

#### TIME: 3 HOURS

#### **Instructions to Candidates:**

You should have the following for this examination:

- Answer Booklet
- Pocket Calculator
- Dimension papers
- A copy of the Standard Method of Measurement of Building Works (SMM)

This paper consists of **SIX** questions in **TWO** sections **A** and **B**.

Answer any **TWO** questions from each Section.

Question in Section **A** carry 30 marks each while those in Section **B** carry 20 marks each.

Maximum marks for part of question are as shown.

#### SECTION A: MEASUREMENT

(Answer any **TWO** questions from this section.)

- Q.1 Take off **all** quantities for the Substructure works for Fish Pond shown in drawing No.01. (30 marks)
- Q.2 Take off all quantities for the Substructure works shown in drawing no.1.(30 marks)
- Q.3 (a) With suitable illustrations, explain how the following are used in the Traditional method of Bill of Quantities preparation.
  - Grouping of dimensions
  - Grouping of descriptions
  - Dotting-on
  - Ditto. (12 marks)
  - (b) Give **SIX** purposes of a Bill Quantities with a brief explanation of each. (18 marks)

#### SECTION B: ESTIMATING AND COSTING

(Answer any **TWO** questions from this Section)

# Use the information in Appendix 'A' for price build-up. Assume any other necessary information.

| Q.4 | (a)                                           | List the <b>FIVE</b> main factors to be considered in the build-up of a unit rate.                                                                                                                                                                                       |                                                                                                                                    |            |
|-----|-----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------|------------|
|     | (b)                                           | (b) Explain the following terms as used in Estimating and Costing:                                                                                                                                                                                                       |                                                                                                                                    |            |
|     |                                               | <ul><li>All-in-labour rate.</li><li>Owning and operating costs for Plant.</li></ul>                                                                                                                                                                                      |                                                                                                                                    | (8 marks)  |
| Q.5 | Build up unit rates for the following items:- |                                                                                                                                                                                                                                                                          |                                                                                                                                    |            |
|     | (a)                                           | Excavate foundation trench not exceeding 1.5                                                                                                                                                                                                                             | 0m deep. [CM]                                                                                                                      | (10 marks) |
|     | (b)                                           | Mass concrete 1:3:6 in strip foundations. (CM                                                                                                                                                                                                                            | [)                                                                                                                                 | (10 marks) |
| Q.6 | (a)                                           | Build up the hourly rate of owning and operating a 200 liter capacity concrete mixer using the following information:-                                                                                                                                                   |                                                                                                                                    |            |
|     |                                               | <ul> <li>Purchase of new mixer</li> <li>Salvage value after six (6) years</li> <li>Cost of transport per year</li> <li>Interest and Insurance per year</li> <li>Maintenance and repairs per year</li> <li>Annual working time<br/>Fuel per 8 hour working day</li> </ul> | Kshs.1,600,000.00<br>Kshs.185,000.00<br>Kshs.40,000.00<br>30% of annual depr<br>20% of annual depr<br>2000 hours<br>Kshs.2,400.00. |            |

(b) If the concrete mixer in question 2(a) above has a time cycle of 5 minutes, calculate its output.

(4 marks)

### DATA FOR USE IN ESTIMATING AND COSTING

| All-in Skilled labour rate per hour                                 | sh.90.00    |  |  |  |  |
|---------------------------------------------------------------------|-------------|--|--|--|--|
| All-in unskilled labour rate per hour                               | sh.80.00    |  |  |  |  |
| Labour constants:                                                   |             |  |  |  |  |
| Excavate top soil average 150mm deep per SM                         | 0.35 hrs    |  |  |  |  |
| Excavate to reduce levels average 150mm deep per SM                 | 0.45 hrs    |  |  |  |  |
| Excavate to reduce levels average 200mm deep per CM                 | 2.40 hrs    |  |  |  |  |
| Excavate foundation trench not exceeding 1.50m deep per CM          | 3.25 hrs    |  |  |  |  |
| Excavate foundation trench exceeding 1.50m but not exceeding        |             |  |  |  |  |
| 3.00m deep per CM.                                                  | 6.50 hrs    |  |  |  |  |
| Excavate pit for isolated base not exceeding 1.50m deep per CM      | 5.00 hrs    |  |  |  |  |
| Excavate pit for isolated base exceeding 1.50m but not exceeding    |             |  |  |  |  |
| 3.00m deep per CM                                                   | 10.00 hrs   |  |  |  |  |
| Offloading cement in 50 Kg. bags per ton                            | 1.50 hrs    |  |  |  |  |
| Mixing, transporting, placing and compacting concrete in foundation |             |  |  |  |  |
| trenches not exceeding 150mm thick per CM                           | 4.66 hrs    |  |  |  |  |
| Mixing, transporting, placing and compacting concrete in foundation |             |  |  |  |  |
| trenches 150-300mm thick per CM                                     | 4.33 hrs    |  |  |  |  |
|                                                                     |             |  |  |  |  |
| Materials:                                                          |             |  |  |  |  |
| Cement in 50 Kg. bags delivered to site                             | sh.700.00   |  |  |  |  |
| Fine aggregate (sand) per ton delivered to site                     | sh.800.00   |  |  |  |  |
| Ballast per ton delivered to site                                   | sh.1,800.00 |  |  |  |  |
| Density of Cement                                                   | 1442 Kg.    |  |  |  |  |
