

# TECHNICAL UNIVERSITY OF MOMBASA

## FACULTY OF ENGINEERING AND TECHNOLOGY

DEPARTMENT OF ELECTRICAL/ELECTRONICS ENGINEERING

### UNIVERSITY EXAMINATION FOR:

### BACHELOR OF SCIENCE IN ELECTRICAL/ELECTRONICS ENGINEERING

SMA2276: COMPUTER PROGRAMMING II

END OF SEMESTER EXAMINATION

SERIES: APRIL 2016

TIME: 2 HOURS

DATE: Pick Date Select Month 2016

#### Instructions to Candidates

You should have the following for this examination

-Answer Booklet, examination pass and student ID

This paper consists of **FIVE** questions. Attempt question ONE (Compulsory) and any other TWO questions.

**Do not write on the question paper.**

#### Question 1

a) Write the meaning of the following symbols in FORTRAN

- i. !
- ii. ::
- iii. ++
- iv. ==

[4marks]

b) Briefly explain the four parts of FORTRAN Program

[4marks]

c) explain the following concepts as used in Programming

- i. Structured programming
- ii. Modular programming

[6marks]

d) Briefly state the form of putting comments in FORTRAN90 programming

[4marks]

e) Write a short statement to distinguish the following concepts as used in FORTRAN

- i. Declaration
- ii. Initialization
- iii. Assignment

[6marks]

f) State any THREE advantages of structured Programming

[6marks]

### Question 2

a) Write the syntax of the following Fortran keywords

- i. open
- ii. Write
- iii. Stop
- iv. close
- v. Format

[10marks]

b) Write a program called money.f90 that calculates the value of \$1000 investment after five years for interest rates of 12%,14%,16% and 8% and writes the interest rates and results neatly on the screen

[10marks]

### Question 3

a) Explain the meaning of the following Fortran keywords

- i. integer
- ii. Write
- iii. real
- iv. Implicit
- v. Format

[10marks]

b) Write a program called money.f90 that calculates the value of \$2000 investment after five years for interest rates of 12%,14%,16% and 18% and writes the interest rates and results neatly on the screen

[10marks]

### Question 4

a) Explain the meaning of the following terms in Fortran

- i. Intrinsic function
- ii. Double precision
- iii. Redirected output
- iv. Data type
- v. complex

[10marks]

b) Write a program called trig.f90 that prompts for an angle in radians from the keyboard and then prints out neatly using format statement on the screen the sine, cosine and tangent of the angle.

[10marks]

### Question 5

a) Design and write a program that :

- i. Has three integer variables(a,b,c)
- ii. Initializes them to 10,20, and 30 respectively
- iii. Finds the average of the 3 numbers
- iv. Stores the average in the first variable(a)

[10marks]

b) Briefly explain the meaning of any FIVE intrinsic functions in FORTRAN

[10marks]
