

# TECHNICAL UNIVERSITY OF MOMBASA

---

FACULTY OF APPLIED AND HEALTH SCIENCES

DEPARTMENT OF PURE & APPLIED SCIENCES

**UNIVERSITY EXAMINATION FOR:**

**BACHELOR OF TECHNOLOGY IN INDUSTRIAL MICROBIOLOGY AND  
BIOTECHNOLOGY**

Type unit code : ABT 4307: PROTEIN BIOTECHNOLOGY

END OF SEMESTER EXAMINATION

**SERIES: APRIL 2016**

**TIME: 2 HOURS**

**DATE: 13 May 2016**

## **Instructions to Candidates**

You should have the following for this examination

-Answer Booklet, examination pass and student ID

This paper consists of Choose No questions. Attempt Choose instruction.

**Do not write on the question paper.**

---

## **Question ONE**

- Name any 2 strains of filamentous fungi that are used as expression systems for producing recombinant proteins (2mks)
- Outline 3 foldases that accelerate the rate-limiting steps in enhancing *in vivo* folding of recombinant proteins (6mks)
- Name any 3 genera of methylotrophic yeasts (3mks)
- Name any 2 proteins expressed by transgenic goats (2mks)
- Highlight the benefits associated with exploiting transgenic trypanosomes expression systems for proteins (3mks)
- Explain the difference between animal and microbial cells (3mks)
- Describe advances in recombinant DNA technology that has been adopted in the production of industrial enzymes (4 mks)
- Highlight recombinant pharmaceutical products that have radically improved human health care (4 mks)

i) State the advantages of using animal bladder as a bioreactor instead of the mammary gland for the production of recombinant products (3mks)

### **Question TWO**

- a) Explain the role of Glycosylation in the production of recombinant proteins (10mks)
- b) Describe the advantages of *Bacillus* as expression systems for proteins (10mks)

### **Question THREE**

Discuss co-expression of chaperones and foldases as strategies for enhancing the solubility of proteins (20mks)

### **Question FOUR**

Discuss the benefits of recombinant protein production in plants over cell cultures and live animals (20mks)

### **Question FIVE**

Describe the industrial role of the following proteins from higher plants

- a) Papain (10mks)
- b) Ficin (10mks)
