DIPLOMA IN INFORMATION COMMUNICATION TECHNOLOGY (DICT10M) DIPLOMA IN INFORMATION TECHNOLOGY (DIT10M)

EIT 2015: OBJECT ORIENTED PROGRAMMING (OOP)

SPECIAL/SUPPLEMENTARY EXAMINATION

SERIES: FEBRUARY/MARCH 2012 **TIME:** 2 HOURS

Instructions to Candidates:

You should have the following for this examination

- Answer Booklet

This paper consist of **FIVE** questions in **TWO** sections **A & B**Answer question **ONE** (**COMPULSORY**) and any other **TWO** questions
Maximum marks for each part of a question are as shown
This paper consists of **THREE** printed pages

SECTION A (COMPULSORY)

Question one

i) Explain the term 'Computer Program'. a)

[2 marks]

ii) State any **four** disadvantages of machine programming language. [4 marks]

Draw a program flowchart to read twenty integer values and then display the sum of iii) even numbers.

[7 marks]

b) i) Develop a C++ program to implement Q1(a) (iii) above. [7 marks]

State any **three** data types in C++ programming language. ii)

[3 marks]

SECTION B (Answer any two questions)

Ouestion two

- a) Describe:
 - i Any **two** selection control structure.
 - Any **two** repetition control structure. ii.

[4 marks]

b) State **one** example of each of the above in question 2(a).

- [4 marks]
- c) Write a C++ program to read a student name and the score for a particular subject. The program should output grads as follows:-

Below 60 'FAIL' [8 marks]

d) State the **three** Logical Operators.

[3 marks]

Ouestion three

i) Explain the term 'Modular Programming. a)

[2 marks]

ii) Explain any **four** advantages of module programming. [8 marks]

b) Write a C++ program to calculate factorial of a number using a function. Given the following:-

$$O! = 1$$

$$1! = 1$$

$$n! = n \times (n-1)!$$

[7 marks]

- c) Write the following statements in more compact way:
 - i. a = a + 1
 - ii. a = a + b

iii. $a = a \times 500$ [4 marks]

d) Explain the term 'Global Variable'

[2 marks]

Question four

- a) Define the following terms giving examples.
 - i. Delimiter.

ii. String Literals. marks

[4

b) Explain any **three** errors that can occur in a C++ program.

[6 marks]

c) Distinguish between Interpreter and Compiler.

[4 marks]

d) Write a C++ program to read marks of student. The list of marks ends with '999. The program should output average mark of the students. [6 marks]

Ouestion five

a) i) Define the term 'Relational Operator'.

[2 marks]

ii) Explain any **four** relational operators.

[4 marks]

b) Write a billing program for a small hotel. The hotel charges a high rate (called the rack rate) and a discounted rate. First-time customers are charge the rack rate and repeat customers get the discount.

Rack Rate = 1750.00.

Discounted Rate = 1500.00.

[7 marks]

c) State the format for the switch expression (case).

[4 marks]

d) Write a C++ program to read **three** data items, then compare them and display the largest.

[6 marks]
