FACULTY OF ENGINEERING & TECHNOLOGY

DEPARTMENT OF MECHANICAL AND AUTOMOTIVE
ENGINEERING

BACHELOR OF ENGINEERING IN MECHANICAL ENGINEERING

EME 4201 ENGINEERING MECHANICS I -STATICS

SUPPLEMENTARY EXAMINATIONS

YEAR II SEMESTER I EXAMS

SERIES OCTOBER 2011

TIME 2HRS

INSTRUCTION TO CANDIDATES

You should have the following for this examination

- Drawing instruments
- Scientific Calculator

This paper consists of **FIVE** questions in, question **ONE** is compulsory,

Answer question **ONE** and any other **TWO** question,

Maximum marks for each part of a question are as shown.

Question 1

- a) State the following:
- i. Newton's laws of motion (3 marks)
 - ii. Newton's law of gravitational attraction (1 mark)
- b) Determine the magnitude and direction of F_1 in figure 1 required to keep the concurrent force system in equilibrium (12 marks)
- c) Using the method of sections, determine the force in members CD and CM of the bridge truss in figure 2 and determine whether the members are in tension or compression. Also determine all zero force members. (14 marks)

Question 2

- a) Resolve the force F_1 in figure 3 into components acting along the u and v axes, determine the magnitude of the components. (5 marks)
- b) Determine the maximum weight W of the block that can be suspended in the position shown in figure 4, if each cord can suspend a maximum tension of 80 N. Determine also the angle θ for equilibrium. (15 marks)

Question 3

Determine the force in each member of the truss in figure 5 and determine whether the members are in tension or compression. Set $P = 8 \text{ KN}$ (20 marks)

Question 4

Draw the shear and bending moment diagrams for the beam in figure 6:

- i. In terms of the parameters shown
- ii. Set $M_0 = 500 \text{ Nm}$, $L = 8 \text{ m}$ (20 marks)

Question 5

a) State the two theorems of Pappus and Guldinus.

(2 marks)

b) Each of the members of the frame in figure 7 has a mass per unit length of 6 kg/m. locate the position (x, y) of the centre of gravity. Also determine the reactions at the pin A and roller B.

(18 marks)
