

TECHNICAL UNIVERISTY OF MOMBASA

Faculty of Engineering & Technology

UNIVERSITY EXAMINATION FOR:
BACHELOR OF TECHNOLOGY IN INFORMATION TECHNOLOGY
(BTIT 13M/BTIT 12J)

EIT 4302: SOFTWARE ENGINEERING

END OF SEMESTER EXAMINATION

SERIES: APRIL 2014

TIME: 2 HOURS

Instructions to Candidates:

You should have the following for this examination

- *Answer Booklet*

This paper consists of **FIVE** questions.

Attempt question **ONE (COMPULSORY)** and any other **TWO** questions

Maximum marks for each part of a question are as shown

This paper consists of **TWO** printed pages

Question One (Compulsory)

- a) State any **FOUR** characteristics of software development lifecycles. **(4 marks)**
- b) Briefly describe the following software development lifecycles models. **(16 marks)**
- (i) Waterfall model
 - (ii) Spiral model

- (iii) Incremental model
- (iv) Prototyping model

Question Two

- a) Define the term “software Development Lifecycle” (2 marks)
- b) Explain any FOUR fundamental activities in all software development processes. (8 marks)
- c) Briefly distinguish between the following as used in software engineering: (4 marks)
 - (i) Verification and validation
 - (ii) Coupling and cohesion
- d) Explain any THREE types of software modularity. (6 marks)

Question Three

- a) Define the term “Software Engineering” (2 marks)
- b) Explain any FOUR key challenges facing modern software engineering. (8 marks)
- c) Briefly explain any FOUR professional and ethical responsibilities of software engineers (8 marks)
- d) Distinguish between software engineering and computer science. (2 marks)

Question Four

- a) Define the term “software” as used in software engineering. (2 marks)
- b) Briefly explain any FOUR attributes of good software. (8 marks)
- c) Briefly describe the software engineering framework for software development. (8 marks)
- d) Explain the meaning of the term “software crisis” (2 marks)

Question Five

- a) Define the term “Requirement” as used in software engineering. (2 marks)
- b) Distinguish the following types of requirements and provide an example for each. (10 marks)
 - (i) Software requirements
 - (ii) Systems requirements
 - (iii) User requirements
 - (iv) Functional requirements
 - (v) Non-functional requirements
- c) Describe the software testing stages. (8 marks)
