

# THE MOMBASA POLYTECHNIC UNIVERSITY COLLEGE

(A Constituent College of JKUAT)

Faculty of Engineering and Technology

#### DEPARTMENT OF BUILDING AND CIVIL ENGINEERING

# UNIVERSITY EXAMINATION FOR DEGREE IN BACHELOR OF SCIENCE IN CIVIL ENGINEERING

ECE 2211: ENGINEERING SURVEYING II

#### SPECIAL/SUPPLEMENTARY EXAMINATION

SERIES: FEBRUARY/MARCH 2012
TIME: 2 HOURS

#### **Instructions to Candidates:**

You should have the following for this examination

Answer booklet

This paper consists of **FIVE** questions

Answer question **ONE** (**COMPULSORY**) from **SECTION A** and any other **TWO** questions from **SECTION B** Maximum marks for each part of a question are clearly shown

This paper consists of **FIVE** printed pages

## **SECTION A (COMPULSORY)**

#### Question 1 (20 marks)

a) The coordinates of S, A and L were given as  $N_S = 1170.50$  M,  $E_S = 1309.12$  m;  $N_A = 958.87$  m,  $E_A = 1525.43$  m,  $N_L = 565.81$  m,  $E_L = 1231.08$  m respectively. Compute the coordinates of B which

are located by the intersection from stations S, A and L by observing the following angles: BSA

$$\alpha$$
  $\beta$  = 85°38'49", SAB ( ) = 55°50'53", BAL ( ) = 41°41'48" and ALB ( ) = 68°09'32" (10 marks)

b) A traverse was run between Pussy and Puppy to fix new points  $N_6$ ,  $N_7$ ,  $N_8$ ,  $N_9$ ,  $N_{10}$  and  $N_{11}$ . The bearings were provided. Given the following information, compute the final corrected coordinates for the new points. The data was as follows:

Pussy: +26594.36; +686431.52 Puppy: +28162.86: +685828.56

Other details included:

Pussy to N<sub>6</sub>

251°44'01" and 340.55m

 $N_6$  to  $N_7$ 

254°03'22" and 272.321 m

 $N_7$  to  $N_8$ 

43°08'09" and 480.508 m

 $N_8$  to  $N_9$ 

05°20'53" and 206.399 m

 $N_9$  to  $N_{10}$ 

326°19'50" and 364.981 m

 $N_{10}$  to  $N_{11}$ 

338°06'50" and 335.418 m

 $N_{11}$  to Puppy

298°32'40" and 443.924 m

(14 marks)

$$\alpha$$
  $\beta$ 

c) With an aid of a sketch, show that when and are angles depression horizontal distance H is given by the equation below:

$$H = \frac{S}{\tan \alpha + \tan \beta}$$
 where S = staff intercept (6 marks)

### SECTION B (Answer any TWO questions from this section)

## Question 2 (20 marks)

- a) Define teacheometry. A theodilite whose height of the instrument level is 1.85 m has a multiplying constant of 100 and additive constant of 1.0. If the angle of elevation is 8° and the upper, middle and lower stadia readings are 4.99 m, 3.5 m and 2.1 m respectively. What is the distance of the staff from the station and what would be the reduced level at the staff? (4 marks)
- b) Define triangulation. The filed abstract from a triangulation scheme established for a small construction site shown in figure 1 had the following dat. By employing equal shift method, adjust the angles.

#### Angle Observed value

- 1 26°10'48"
- 2 27°37'16"
- 3 35°46'10"
- 4 32°57'52"
- 5 28°23'17"
- 6 29°04'37''
- 7 126°11'59"
- 8 111°15'52"
- 9 122°32'02"

Fig I

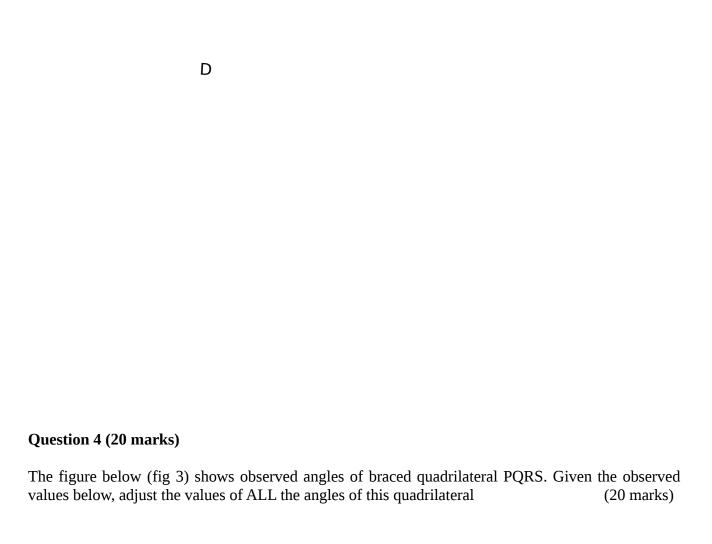

# Question 3 (20 marks)

- a) Using sketches, differentiate between FACE LEFT and FACE RIGHT (4 marks)
- b) Discuss the **TWO** main methods of error distribution in traversing citing the assumptions made by each method (6 marks)
- c) Make short notes on the following
  - (i) Primary triangulation
  - (ii) Secondary triangulation
  - (iii) Tertiary triangulation

(3 marks)

(16 marks)

d) An open traverse was run from A to E, given using the sketch and the information provided, computer the partial coordinates of each line (7 marks)

# Question 5 (20 marks)

a) Given the following coordinates of M and N, compare the table by using BODWITCH METHOD

Std	Bearing	Dist.	Calculated		Adjustments		adjusted		Final Coordinates	
			$\Delta E$	$\Delta N$	δE	δN	$\Delta E$	$\Delta N$	E	N
MB	356°20'30"	110.41								
BC	19°53'00"	120.4								
		1								
CD	24°32'30"	150.2								
		2								
DN	350°22'30	98.16								

The coordinates are provided as follows:

Coordinates Northings (M) Eastings (M)

M +559.29 209.42 N 502.39 +129.63 (10 marks)

b) The adjusted angles of a triangle ABC are as given below:

$$\beta_A = 74^{\circ}04'25''$$

$$\beta_{\scriptscriptstyle B}=43^{\circ}35'49''$$

$$\beta_C = 62^{\circ}19'49''$$

Given the datum coordinates of A and B as follows, compute the provisional coordinates C

	N(M)	E(M)	
A	+ 643 649.19	+ 409 577.46	
В	+ 641 668.40	+ 412 600.36	(10 marks)
